

Series E is a sophisticated solution for high performance washing with immediate reducing of the running costs in water, detergents and energy consumption.

The advantages of the E series are the following:

- Ease of use
- Real measuring of the running cost
- ECO function which lowers the boilers temperature when the machine does not work for long time
- Wash circuit with high performance
- Silence due to new type of pump and double skin
- Self – diagnostics alarms
- Display of program, temperature and messages
- Ease manage of the dosing pumps
- Easy programmability of the basic parameters
- Multi-language
- Rinse pump with break tank for stable rinsing and low water consumption

Technical specification E 600

Power supply	230 V	400V
Total Power	3,6 Kw	6,6 Kw
Electrical absorption	15,4 A	16,4 A
Boiler's heating element	3 Kw	6 Kw
Tank's heating element	1,5 Kw	1,5 Kw
Boiler's capacity	6 Lt	
Tank's capacity	10 Lt	
Water consumption	2,3 Lt	
Dimensions	625mm X 57mm X 83mm	
Basket	500 mm X 500 mm	
Programs	Short / Standard / intensive / Unlimited	
Pump power	0,4 Kw	
Water supply	¾"	
Peristaltic detergent pump	Std	
Peristaltic rinse pump	Std	
Boiler's thermal protection	Std	
Tank's thermal protection	Std	
Boiler's thermometer	Std	
Tank's thermometer	Std	
Draining pump	Std	
Rinse pump with break tank	Opt	
Cold rinse	Std	
Self-cleaning	Std	
Self-diagnostics	Std	
Maintenance notification	Std	

Std= standard

Opt= optional
